

# PHYTO-C for Aging

Restore Collagen / Even Skin Tone / Prevent or Reverse Signs of Aging

## Morning

*SUPERHEAL O-live Serum to  
heal and reverse signs of aging*

*Velvet Gel for ages 30  
something and older*

1. \* Wash Skin with Soothing Cleanser and Balancing Toner
2. Use **SUPERHEAL O-live Serum** (contains a combination of Vitamins A, C, E and Olive Leaf Extract which provides the highest antioxidant protection and reduces damage caused by the sun) – to reverse signs of aging.
3. Then **Velvet Gel** to retain and build collagen.

**SUPERHEAL O-live Gel** is a great addition option for this skin care combo because it protects your skin from free radicals and can apply this all day long – as needed - for dry skin.

Do NOT confuse the serum for the gel. The serum is optimal for most skin types when used a maximum of once per day before Velvet, O-Live, and sometimes Phyto Plus Gel. The SUPERHEAL O-live gel is the only O-live product we currently offer that can be used all day as needed.

## Nighttime

1. \* Wash Skin with Soothing Cleanser and Balancing Toner (For your PM routine: If you wear waterproof or budge-proof makeup, you will need to remove this first with micellar water or witch-hazel.)
2. Use **SUPERHEAL O-live Serum**. This serum is very strong and some find it's too much to use this product twice daily. They still see great results by using it once daily in the morning.
3. Then **Velvet Gel** or if you have O-live Gel, this is also great to use just before bed.

The U.S. based company, PHYTO-C, uses 99% natural and organic ingredients than any leading competitor in high-end skin care.

\*We highly recommend the anti-inflammatory PHYTO-C Soothing Cleanser and Balancing Toner. Both products are paraben and gluten-free. They are gentle, non-drying, and leave the skin fresh and conditioned.
